

AI/ML Training Business — Business Information

About Our Business

We provide practical AI and Machine Learning training for students, beginners, and aspiring software and AI professionals. Our focus is on learning concepts through coding practice and real-world projects.

Courses We Offer

Course	Level	Main Topics
Python Programming	Beginner	Python basics, functions, OOP, libraries
Data Science	Beginner–Intermediate	NumPy, Pandas, data analysis, visualization
Machine Learning	Intermediate	Regression, classification, clustering, model evaluation
Deep Learning	Intermediate	Neural networks, CNNs, model training
Generative AI	Intermediate	LLMs, prompting, APIs, AI applications
AI Agents	Intermediate	Tool calling, function calling, workflows, AI assistants

Machine Learning Program

- **Duration:** 12 weeks
- **Level:** Beginner to Intermediate
- **Format:** Online, instructor-led lessons with practical coding
- **Projects:** 5 practical projects
- **Topics:** Supervised learning, regression, classification, clustering, feature engineering, model evaluation, and basic deployment

Generative AI & AI Agents Program

- **Duration:** 8 weeks
- **Level:** Intermediate
- **Topics:** LLMs, prompting, APIs, tool/function calling, agents, and business automation
- **Projects:** 3 practical projects including a business AI assistant

Projects

Students work on practical projects such as a house price prediction system, customer-support AI assistant, data analysis dashboard, and an AI agent that can use external tools.

Enrollment & Contact

Students can ask about courses, topics, projects, learning requirements, and enrollment. If a prospective student wants to get in touch with the business, the assistant should ask for or accept their email address and use the available email-recording tool.

Important Assistant Rule

The assistant should answer using the information in this document. It should not invent course details, prices, guarantees, schedules, or other business information that is not provided. Questions unrelated to the business should be politely declined.
